

in collaboration with

Carbon Tracker Well below 2°C Compliant Scenario Analysis Tool Instructions for Use

Webinar: Streaming on Wednesday July 10 at 11:00 CET

As the the evidence on the links between climate change and business is becoming clearer, the debate on these connections is expanding and engaging an increasing number of stakeholders and discussants. At the European level, the discussion fits into the regulatory framework set by the European Commission, which aims to guide firms to disclose information on how climate change affects their business, and on the methodologies they adopt to tackle this issue.

Amongst the normative prescriptions and the non-binding recommendations - in particular concerning the ones published by the Task Force on Climate-Related Financial Disclosure (TCFD) - the Metrics and Targets section is crucial. The majority of the firms lacks a sound methodology and the tools to evaluate the impact of climate-related risk and opportunities. As a result, some think tanks developed scenario tools especially for firms to widen their information assets and improve their investment decision process.

This webinar will present the tool developed by **Carbon Tracker**, an independent think tank, which focuses on the transition risk inherent in climate change under different scenario hypothesis.

Presenter: Margherita Gagliardi

Discussant: Riccardo Christopher Spani

Riccardo Christopher Spani holds a Bachelor degree and a Master degree in Economics from University of Rome La Sapienza. He is a Researcher at Fondazione Eni Enrico Mattei.

Margherita Gagliardi completed a Master specialisation in Green Management, Energy and Corporate Social Responsibility at Bocconi University in Milan and holds a Ms in Cultural Management and Innovation at the University of Bologna. She is Communications and Design Manager at Carbon Tracker.

This webinar is part of the DeRisk-CO project, developed at FEEM, which aims at stimulating a debate on the importance of assessing and disclosing climate-related risks and opportunities and their impact on financial performance, with a particular focus on Italian businesses.

This webinar is promoted by Fondazione Eni Enrico Mattei in collaboration with Nedcommunity and the Italian Sustainable Investment Forum (ItaSif)

The webinar will be held in English.
