How can geospatial analysis support financial risk management?

Introducing Oxford's Spatial Finance Initiative

Webinar: Streaming on Thursday October 31st at 12:30 p.m. CET

The importance of assessing and measuring climate-related risks and opportunities, alongside with the financial impact that these can have on firms business activities, are crucial topics when it comes to discuss about sustainable investment strategies, not only because the normative prescriptions and the non-binding recommendations suggest to report on Metrics and Targets, but also because the majority of firms lack of sound assessment methodologies. As a result, some think tanks developed scenario tools for firms and for financial operators to widen their information assets and improve their investment decision process.

This webinar is aimed at understanding how Oxford's newly established research project will be translated into practical and pre-operational products and services by working closely with the finance community and geospatial and financial services providers.

Presenter: Riccardo Christopher Spani

Speaker: Ben Caldecott

Riccardo Christopher Spani holds a Bachelor degree and a Master degree in Economics from University of Rome La Sapienza. He is a Researcher at Fondazione Eni Enrico Mattei.

Ben Caldecott holds a doctorate in economic geography from the University of Oxford. He is the founding Director of the Oxford Sustainable Finance Programme, Associate Professor and Senior Research Fellow at the University of Oxford Smith School of Enterprise and the Environment, Visiting Researcher at The Alan Turing Institute, Visiting Scholar at Stanford University, Senior Advisor to the CEO and Chair of the UK Green Finance Institute (GFI) and Policy Associate at the UK's Department for Environment, Food and Rural Affairs (DEFRA), where he is a Director-level secondee in the Strategy Directorate.

This webinar is part of the DeRisk-CO project, developed at FEEM, which aims at stimulating a debate on the importance of assessing and disclosing climate-related risks and opportunities and their impact on financial performance, with a particular focus on Italian businesses.

This webinar is promoted by Fondazione Eni Enrico Mattei in collaboration with Nedcommunity and the Italian Sustainable Investment Forum (ItaSif).

The webinar will be held in English.
