

Sustainable finance solutions for citizen energy communities

NEON project aims at developing and establishing a technical and business ecosystem for integrated energy services for European energy communities. These entities shall be capable of saving energy, reducing CO2 emissions, and bringing economic and social benefits while valorising energy efficiency and flexibility on the demand side.

The event will be focused on sharing experiences, best practices, and key challenges in creating and developing renewable energy communities, with a focus on the economic sustainability of projects and financial solutions adopted to support building energy efficiency, renewable energy, and digital innovation.

25 October 2022, 10:00-12:00 (ZOOM)
