L'ENERGIA BUONA

**The role of communities and energy citizens
for a just and accessible transition**

è

About ènostra

National **energy cooperative**, based on active **participation** and direct involvement of **energy citizens**, that develops **collective power plants** and **delivers renewable energy** to its members

Ènostra coop today

Production and sale
of **renewable,
ethical and
sustainable energy**

Realizes **new
production plants**
thanks to the investor
members

Aims at **increasing renewable
energy quote** in the national
mix and contributing to energy
transition **involving energy
citizens**

Provides services and
**solutions for energy saving
and self production** for
households and SMEs

Information service
and **training** to
improve awareness
and **tackling energy
poverty**

Activates **renewable energy
communities** and **self
consumption schemes**

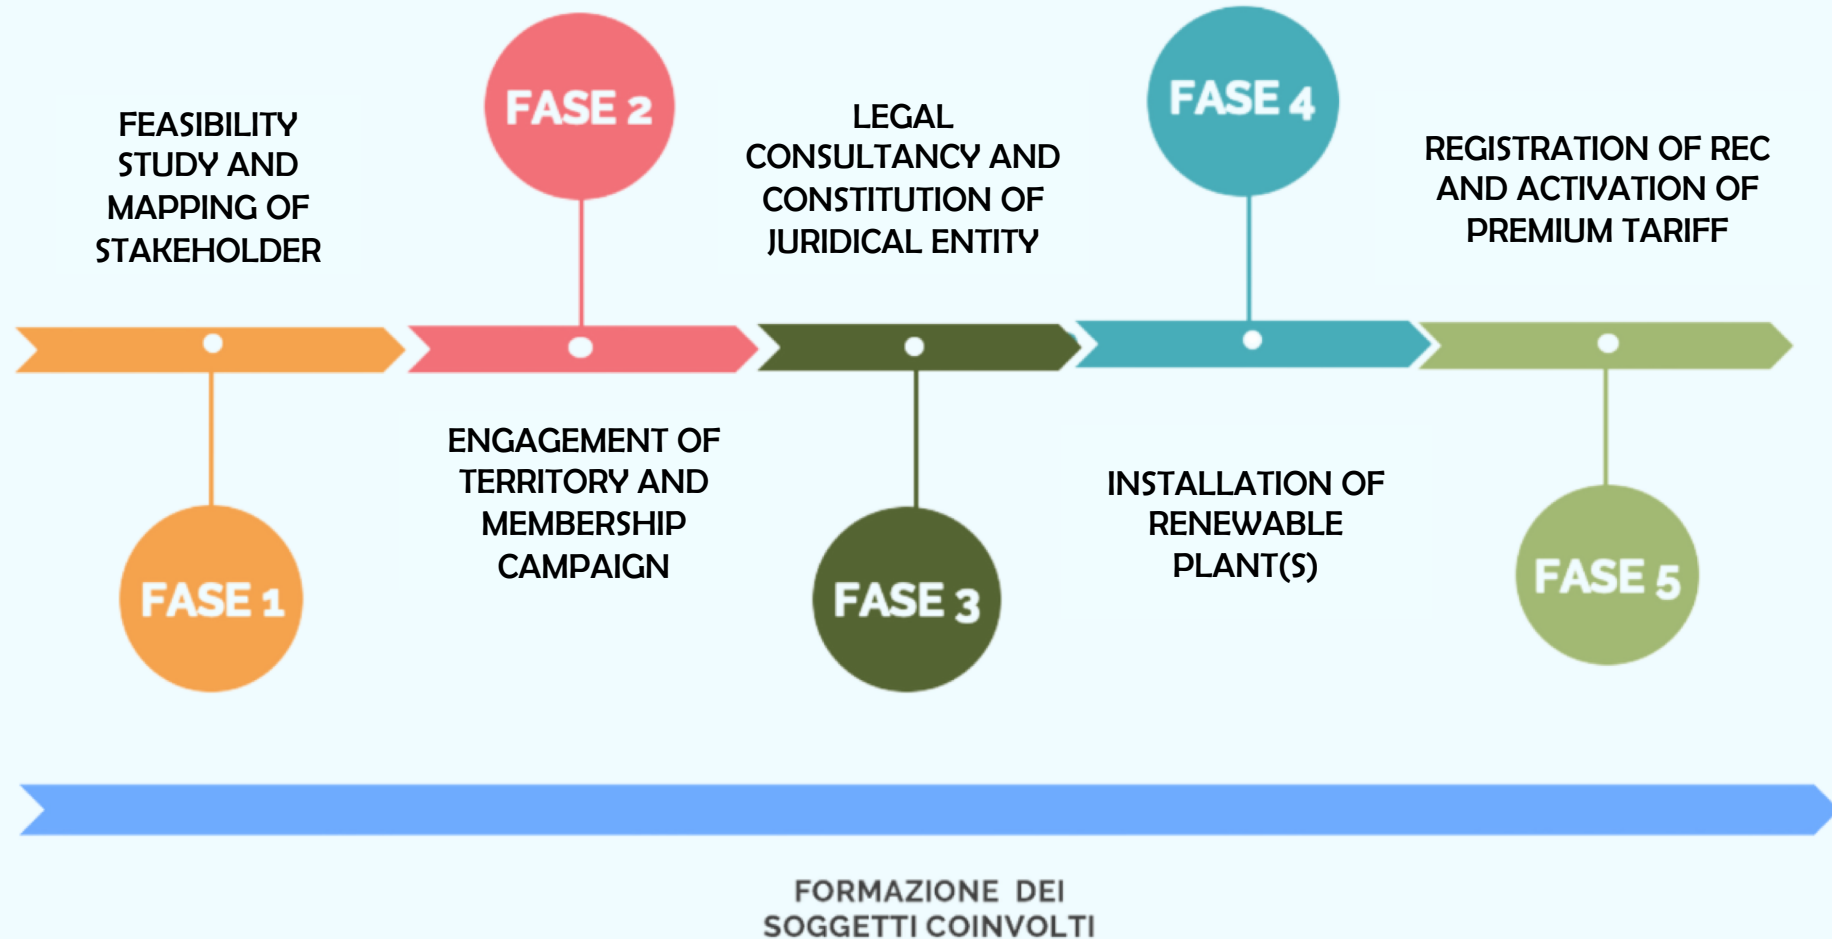

è What is an energy community?

- An Renewable Energy Community is a juridical subject that can produce, consume, sell, stock and share renewable energy among its members;
- The members need to be close by to the power plants that provide the energy for the REC;
- It must not pursue profit;
- REC's main objective is to pursuing economic, social and environment goals.

Soggetti proponenti

- Agenda 21 Laghi (VA)
- Comune di Ballao (SU)
- Comune di Biccari (FG)
- Comune di Bolotana (NU)
- Comune di Brindisi (BR)
- Comune di Melpignano (LE)
- Provincia Monza Brianza (MB)
- Comune di Santeramo in Colle (BA)
- Comune di Sestri Levante (GE)
- Comune di Torreberetti e Castellaro (PV)
- Comune di Ussaramanna (SU)
- Comune di Villanovaforru (SU)
- Politecnico di Milano (MI)
- Powersafe srl (RC)
- Cooperativa So.L.E. (TN)
- Uniabita Soc. Coop. (MI)
- Ecovillaggio Corte del Vento (VI)
- Legacoop Romagna (RA)

How to finance a Renewable Energy Community

- Local administrations can fund a PV plant on a public building by using a **state grant**. In this case, the administration draw up a document where it officially provide the community with the energy of that PV plant;
- In Italy, the **national recovery and resilience plan** will grant municipalities with less than 5.000 inhabitants who wants to activate a REC (interest-free grants).
- Rental of the PV plant installed by a third investor.
- Capital raising among the members of the REC (for small PV plant).
- Bank financing

- 14th July 2021: **Constituent Assembly** of the juridical subject;
- PV plant of about **60kWp**;
- **62 founding members**;
- For the municipality, the REC is becoming a subject to consult **for local energy policy**;
- The aim is also to develop a **guidance service** in order to encourage **private energy efficiency investments**, promote **cooperative of community** with the activation of other services.

THANK YOU!
